

Victor Castaneda

SOFTWARE ENGINEER

Results-driven Software Engineer with over 6 years of experience specializing in backend, front-end development and data engineering across AWS, GCP, and Azure platforms. Proficient in building scalable microservices and data pipelines using Python, Django, Django Rest Framework, Flask, FastAPI. Proficient in support Angular and TypeScript applications development and modern cloud tools. Passionate about delivering clean, efficient code and contributing to high-impact, cross-functional projects.

EXPERIENCE

AI Developer

MindTech

May 2024 - Current (3 months)

- Design, develop and manage FastAPI microservices
- Build Python microservices *using AZURE (Storage Account, AKS, Kubernetes)*

Software Engineer

Wizeline

Jun 2024 to Feb 2025 (8 months)

- Design and manage cloud-native infrastructure using AWS (Lambda, S3, Batch, RedShift)
- Build Python microservices *using AWS (Lambda, ApiGateway, S3, DynamoDB).*

Data Engineer

Sofka Technologies

Jan 2023 to Jun 2024 (1 year and 4 months)

- *Develop scalable data pipelines using Apache Spark and Data Factory*
- *Orchestrate cloud infrastructure in in AWS, GCP and Azure*
- *Manage MongoDB databases and create custom dashboards for real time monitoring.*
- *Participate in software architectural design and planning.*

Consultant Development

Sofka Technologies

Jan 2023 to Jun 2024 (3 months)

- *Manage MongoDB database instances.*
- *Support architectural software design.*
- *Build GCP, AWS and Azure pipelines*

EDUCATION

LANGUAGES

Backend Engineer

Hey! Startup

Jan 2022 to Jan 2023 (1 year)

- Refactor, testing and build new microservices using AWS as development framework and Python and JavaScript as programing languages.
- Refactor, testing and build new web services for the own Django Rest Framework API.
- Build SQL queries and storage procedures over the Postgresql database.
- Develop new features in fron-end service using Angular and TypeScript

Middle Python Developer

Globant, Inc.

Feb 2021 to Jan 2022 (11 Months)

- Support the back-end development testing, refactoring and building new features.
- Support the migration process from Python2 to Python 3, building and management testing process

Junior Python Developer

OMNI.PRO

Feb 2020 to Feb 2021 (1 Year and 1 month)

- Refactor, testing and build new microservices using Odoo as development framework, Python as programming Language and Postgresql as database.

Engineer Development Intern

Cencosud

Aug 2019 to Feb 2020 (6 Months)

- Build sales monitoring dashboard using Django as development framework, Python as programming Language and Postgresql as database.
- Build automated load data process and clean data using Python

Master's Degree Software Engineering

Universidad de los Andes - Colombia

Starting year 2023

End year: 2024

Bachelor's Degree Systems Engineering

Universidad Jorge Tadeo Lozano - Colombia

Starting year: 2015

End year: 2021
